**POSITION TITLE: Firefighter**

**IMMEDIATE SUPERVISOR: Lieutenant**

**EMPLOYMENT HOURS: Hourly Shift Work (24/48)**

**ACHIEVEMENT METHOD: Hired by Fire Chief**

## **General Description:**

The primary responsibility within this classification is ~~for this position~~ is the protection of life and property. Work associated with this job classification requires an understanding of fire science, including; hazardous materials, fire suppression techniques, technical and special operations.

Work is performed on 24 hour shifts which include holidays and weekends, and under hazardous conditions such as natural disasters and civil disorders. Work is reviewed through observations, reports submitted, and results obtained.

An employee serving in this capacity will need to have general working knowledge and have basic operational capabilities to operate fire apparatus pumps, maintain operating pressures, and supply water to other fire apparatus.

In addition, a firefighter may serve as an acting Driver/Engineer after completing their initial probationary period, completion of the required acting Driver training program, successfully completing an accredited 40-hour pump class and have a current EVOC class of 16 hours. Further, a firefighter may serve as an acting Lieutenant after completing their initial probationary period, completion of the required acting Driver Engineer program, completion of the required acting Lieutenant program, three years of experience as a professional firefighter, and possession of the

Florida Fire Officer I certification. An employee cannot begin the acting Driver training program or acting Lieutenant program until they have completed their probationary period.

Employee must maintain current levels of EMT or Paramedic certifications.
