EMS Supply Replacement

Supplies used during a call from the drug box, respiratory box or trauma box will be replaced from inside of the engines, when available and immediately following any call. Supplies not available on the engines will be restocked from the supply cabinet.

Sunstar Exchange Equipment

The EMS inventory sheet contains a list of current exchange equipment from Sunstar. It is preferred that this equipment be first out on the engines with East Lake equipment kept in reserve. Levels above or below the Inventory requirements are not acceptable and should be reported to the shift Officer.
